1. Reference multiple addressee DF to Chiefs of Technical Services, dated 19 January 1956, file ACSI-CDCI, same subject as above, with one inclosure (Tab A and Tab B of draft report).

2. The following general comments are furnished in regard to the adequacy of subject coverage in Tabs A and B of inclosure to referenced DF.

a. Add to Tab A, all countries: "Mapping and Surveying (including geodesy)-Personalities, organizations, materiel, current programs and accomplishments."

b. Add to Tab A, USSR: "Road Transport - New construction, construction standards, specifications, methods, and materials, type and density of truck traffic."

c. Add to Tab A, all countries: A new item on hydraulic structures, such as dams, levees, and locks as to location, design, and materials.

d. Add to Tab A, all countries, electric power item: "transmission lines." This is now in the USSR section but not for the other countries.

e. Add to Tab A, all countries: A requirement for industrial gasses, particularly liquid oxygen.

f. Add to Tab A, all countries, petroleum section: Natural gas and petroleum pipelines.

g. There is no evidence that the subjects of physical geography and geology are adequately covered in either Tab A or Tab B.

3. Approved For Release 2001/04/24 : CIA-RDP78-03130A000100040010-0  
Arrangement of subjects in GLE RDP 78-03130A000100040010-0 made review easier.  
Such an arrangement would tend to assure that no major subjects were overlooked.
